

East Tamar Landcare Group, in conjunction with TFGA Tamar Valley Branch, Tamar NRM and TIA invite you to view this pasture species demonstration site established in Spring/Summer 2016.

# Pasture Demonstration Site Field Day

Friday, 2<sup>nd</sup> June

"Greenhythe" Archers Rd Hillwood East Tamar

10.30am to 2.30pm

What you will see:

- Compares four pasture plots established to allow producers to see a range of commercially available pasture species in action and in the one paddock environment.
- Side by side pasture mixes of perennial ryegrass and white clover, tall fescue and strawberry clover, cocksfoot and red clover, plantain and red clover are establishing.
- Join us to discuss the challenges the site has posed and the early establishment of the species and mixes.
- Be informed for future observations of production and persistence that time will bring.

## FREE EVENT

Bookings: [tamarnrm@launceston.tas.gov.au](mailto:tamarnrm@launceston.tas.gov.au)

Or phoning Greg Lundstrom on 6323 3310,  
Mob 0438 642 112

## Presenters:

Peter Ball (Extensive Agriculture Centre,  
Industry Development and Extension Leader,  
Tasmanian Institute of Agriculture)

*Where: "Greenhythe" Archer's Farm, Archer's Road, Hillwood, East Tamar*

**Bookings and further information contact  
Tamar NRM on 6323 3310**

**Corey Hogarth**, (Branch Manager Youngtown – Business Services Manager, Senior Consultant Agronomist - TP Jones & Co.) Corey holds a B.Ag.Sci (HONS) PhD and has extensive local knowledge of local conditions as it relates to pastures and agriculture in general. He has worked at TP Jones & Co for over ten years, offering service to growers with assistance in crop agronomy, gross margins and returns, as well as overall farm business analysis. Prior to commencing work at TP Jones & Co., Corey worked at Tasmanian Department of Primary Industries & Water as the Top-Crop Development Officer, and South Pacific Seeds as the Northern Tasmania Production Manager. Corey owns a 70 ha irrigated property located near Cressy producing wheat seed, poppies and prime lambs.

**Peter Ball**, (Industry Development and Extension Officer with Tasmanian Institute of Agriculture) Peter has enjoyed working with and learning about Tasmania's sheep and beef pastures and grazing systems for more than 20 years, firstly within DPIPW and more recently within Tasmanian Institute of Agriculture (TIA). This work has included trials addressing pasture establishment, the management of pasture composition, turning pasture into product, as well as a considerable amount of training and extension. Sharing the learning these years have provided, from both trial work and from the producers who manage real life production pastures, is one of Peter's keenest interests.
