we still pay a very high price which
compared with overseas countries.

And it's not just the cost that is
disconcerting.

It is the vast difference in prices

naving fair and relatively
inexpensive access to it.

Second, there has been a great deal
of fanfare surrounding the
Australian launch of Apple's much-

to almost \$2000 over two years
without call costs.

Not exactly the bargain it was
originally portrayed to be, now is it?

Call for legislation

HOW unusual to read the column
by Michael Lynch, in your
newspaper, Should Heritage
values override development (The
Examiner, July 25). He normally
keeps his head well below the
parapet.

Uniquely in this State, forestry

is exempt from all heritage
legislation, despite the report of
Godden and McKay, commissioned
by the Tasmanian Heritage
Council, stating that this exclusion
should be removed.

Only in Tasmania is there no
legislation covering the concept of
protecting the landscape and no
enabling legislation has ever been

placed before Parliament over
cultural landscapes.

If the landscape of Tasmania
could be protected under Heritage
Legislation then the iconic
Western Tiers could be preserved
from a future trashing by the
logging industry, Tasmanian
Heritage Authorities would then
have something to crow about.

If the Heritage Council
me to change the color
front door here at Ben
can they not be placed
to protect the Arcadia
we are all so lucky to
inherited?

The answer is, the
logging industry.
