

The Flat Earth Society

An Open Letter and Appeal to The Viscount Monckton of Brenchley of the Science and Public Policy Institute

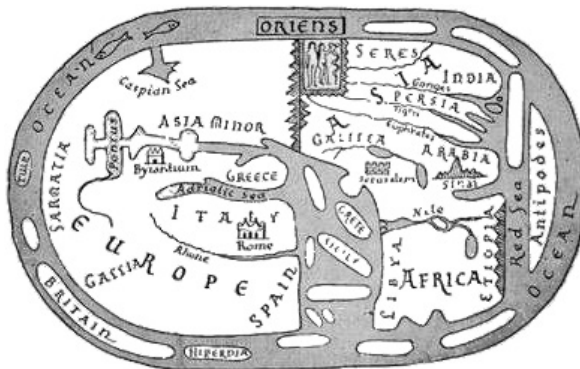

On this 21st day of February in the Year of Our Lord 2013 in the City of Hobart in Tasmania, on the Occasion of Your Good Endeavours to Strike Down the temperature perversions of the Evil and Illegal Government in the City of Canberra and the Dark Lords of the Climate Commission...

Hear Ye Honourable and Esteemed Lord of Middle Earth. We of the Flat Earth Society extend to you a hand of friendship and solidarity.

For too long charlatans have used the black magic of peer-reviewed science to hide truths from the public. They have falsified moon landings, spread the lie of global warming, and most dastardly of all, they say our Earth is a sphere!

We at the Flat Earth Society have had centuries of experience in dealing with such fabrications. At last, we have found another, like-minded group of lonely souls such as the Science and Public Policy Institute and our own No Carbon Tax Climate Sceptics Political Party who are bravely fighting the wave of charlatan science.

We, too, have diagrams that explain our cause:

The Flat Earth Society, the Science and Public Policy Institute and the No Carbon Tax Climate Sceptics Political Party share common cause in facing the threat from scientific miscreants. Like you, our message about the True state of affairs has been suppressed by a conspiracy of governments which have bludgeoned us with their counterfeit scientific evidence.

We, too, have suffered the Dark Arts of Peer Review — and from falsehoods published in the Devil's Papers such as Nature and Science. Just as they have falsified temperature records, petulant rubes like CSIRO and the Bureau of Meteorology have tampered with evidence to suggest that Middle Earth is a sphere when it is well known this is not the case.

We share your grave concern at the false claims in your United Kingdom, in the North American Colonies and here in Australia about the increasing threat from extreme flood, drought and fire weather. It seems the entire Middle Earth has been taken in by this nonsense.

We also seek help to combat the Great Travesty of Modernity called Google Earth, which ignores the existence of the Ice Wall and the Great Turtles that support our Earth.

Perhaps the pieces of gold that have come your way in support of your Great Mission could be shared with us?

We wish you Every Good Fortune in your endeavours in the Antipodes.

Sincerely

Nathaniel Pipe-Blower

33rd-degree Grand Wizard Master
of the First Inverted Pancake Lodge
of the Great Flat Earth Society Ltd.
