Put it together and what have you got?
Mary Massina

Make Tasmania Work

Tasmania is, without doubt, a beautiful place to live. We all enjoy the benefits of living in a modern western economy, and in a truly spectacular corner of the world.

But for all the great things about Tasmania, our island state faces a growing number of social, economic and environmental challenges. It seems that every day our news pages are full of budget blow-outs, hospital waiting lists, potential school closures and doom and gloom.

As proud Tasmanians we know we can do better. Our state and our community deserve better. We can't continue to do things the same old way, just because that's how we've always done them. We need to review the way we govern ourselves, and the way we prepare for the future. We need a plan to make sure Tasmania works - because it's not just about us, it's about the legacy we will leave for future generations.
