stinks

NO PULP MILL FOR THE TAMAR VALLEY

Premier Giddings,

Tasmania's natural environment is our biggest global competitive advantage. Don't sell it down the river.

The Gunns pulp mill still stinks:

- Its approval process was corrupt, and the Pulp Mill Act denies citizens fundamental rights.
- It will pollute the marine environment and damage the fishing industries dependent on Bass Strait.
- The stench and emissions from the mill will seriously impact the Tamar economy and the wellbeing of the community.
- It has no social licence, and never will.

As the new Tasmanian Premier, please shed the murky past.
Stop the mill.
