

Apprenticeships and Traineeships -

How and Why?

Apprenticeships and traineeships provide valued employment and education pathways for individuals of all ages. But we know the training system is complex and can be difficult to navigate. Look no further! The TCCI, in collaboration with TFGA is pleased to provide access to free workshops.

Supported by Skills Tasmania these workshops and support services aim to support businesses to employ apprentices and trainees.

These workshops will provide information and advice on:

- The importance of apprenticeships and traineeships
- Understanding apprenticeships and traineeships
- Best practice employee management to promote retention and completion

The workshops will include:

- free tools and resources
- up to 1 hour of free workplace relations advice to support employers following the workshops. This can be used for any workplace advice such as accessing rates of pay, preparing employment contracts or seeking advice and support to undertake performance management. To access this free workplace relations advice, businesses must attend a workshop.
