

Know the Truth

We don't have a problem with people that struggle with homosexuality and lesbianism; they struggle with it because they know it's wrong. However we do have a problem with people that call: wrong – right, and bad – good, and when people try to pass laws making it legal, right and acceptable when it is clear it's far from the case.

The vast majority of countless people and parents statistically show that they care deeply about their little Kiddies, their future and wellbeing. Allowing sodomite and lesbian marriage would cause a roller coaster of acceptance in adopting babies, toddlers and young children. These children will grow up witnessing multiple same sex partners and all the other things associated with this type of perverse lifestyle. Furthermore the chances that they would not be sexually abused by their 'parents' and social associates are extremely slim. These are the people that prey on the vulnerable and young children. These are the people that use drugs and other measures to engage in abhorrent behaviour. It does not stop there, allowing gay marriage opens up Pandora's Box to all other perversions including bestiality. The Jimmy Saville, the Catholic Priests are just the tip of the iceberg.

Most parents will admit that they do not want their kiddies growing up to be more and more corrupted, as they will witness an ever increasing sodomite and lesbian behaviour in public like it's 'the norm' if gay marriage is accepted. Statistics show that parents want their little boys to grow up to be men and their little girls to grow up to be women and one day to have children of their own.

People advocating gay marriage have a tendency to be compulsive liars to promote their cause whatever the cost and deliberately ignore the facts. The bottom line is that it does not matter how much evidence is brought to the table, it won't be accepted and the people bringing the facts will be attacked. So how do we decide what the truth is, especially when there are many internet links manufactured by gay activists and other apparent heterosexual derived sites that deliberately hide the truth and give false and misleading information? The answer is very simple: Careful research, common sense and life experience. Contrary to the ongoing lies of sodomites and lesbian activists the vast majority of the populace are not sodomites and lesbians and when pushed are not in favour of legalising this particular lifestyle.

Kevin Rudd betrayed the faith. Judas did that to Christ; Kevin Rudd is a Judas and no organization or group of people tolerates a Judas. They deserve what they get. Personal thanks to Julia Gillard for knifing Kevin in the back. Julia saw something in Kevin that most of us did not. She saw a common denominator. The fact is that Julia and Rudd are in it together and both are for gay marriage and know that the only way to do it is to take advantage of the system and the people that they and the media have deceived and manipulated for their own personal advantage. They toe the line to the Rockefellers, the Bilderberg Group and others. They are part of the New World Agenda and have no real heart regard or care for the people they have deliberately deceived through media control and by the testimony of their own mouths. They are sold out and indebted to corrupt powers and couldn't pull out even if they wanted to.

This agenda is pushed by a controlled worldwide media that pushes this lifestyle under the guise of 'equality' all the time sending out signals for the acceptance of same sex marriage. These are the people in control of TV broadcasting stations, many of whom are living these lifestyles themselves and employ likeminded people, all the time undermining non Christians and Christians alike. Next time you see documentaries showing how same sexed parents are 'raising their children' in such a wonderful way, remember it's a lie and propaganda to promote their cause. Calm music playing in the background is part of their ploy in these 'documentaries' and 'randomly placed footage scenes' regularly broadcast on our TV screens to lull our senses into sub consciously accepting this perverse lifestyle.

The government spends multi million dollars informing people of unhealthy lifestyles like drinking and smoking but will not tell the truth on the effects of homosexuality and all the other key points that are detrimental to one's health. Instead they propagate through the media; lies, deceit and cover up. And yet when people speak up on any level they are open for abuse, ridicule, out of a job, up before a tribunal and slandered. That's why they have these 'hate laws' so ultimately they can control people from speaking out and shut them up through fear tactics, like being arrested and thrown into prison or having the 'hate discrimination body' playing their part. This is part of what the New World Agenda is all about. Take for example Michelle O'Byrne who wants to include harsh penalties in the amended abortion bill, with fines up to \$65,000 or one year in jail and the banning of silent non-obstructive protests within 150 metres of an abortion clinic - breaching any reasonable understanding of freedom of speech.

Let's take a look at this hate thing and see who really 'the perpetrators of hate' are. These sodomites and lesbians and their supporters hate God, hate His people and hate His followers. Christians have been quietly bullied, intimidated and persecuted here in Australia for a long time and it's got so bad many fear to speak out. It's not just Christians, there are many more non Christians who are very aware of this.

What about the youth? Many seem pretty happy about Tasmania's "Progressive Social Reforms". But how much is due to what the media has been promoting the last 20 years or more? Many slightly older people can trace the insidious rise of the 'gay agenda' through sitcoms, dramas and movies – and the general 'sexualisation of society' – which can't be escaped wherever you turn. Money power, Hollywood programming and media bias have promoted social values foreign to our cultural heritage. Tasmania was one of the last places in the Anglo-Saxon world to resist pressure to over-turn its anti-sodomy laws. Continual pressure from the UN, lobby groups and being labelled as 'backward' and other derogatory terms ultimately saw these child protective laws repealed against good common sense. Furthermore, pressure for gay marriage comes from a very small, albeit loud, minority. It is fact that of the countries or states where gay marriage has been legalised, only a small portion of the gay community take up the option and an even smaller percentage remain committed in that union. The way forward is to go backwards and criminalise sodomy so we don't end up in this situation again.

Our forefathers knew what was right, they knew that legal acceptance of sodomy and gay marriage would be the beginning of the end. It has never been legalised in history before, and for very good reason. The Anglo Saxon nations stemmed and were built from Christian principles and laws that used to be based on the commandments, at the very least because they made sense and worked because they protected the people regardless of belief. The time for red tape and bureaucracy has gone, it's time to stand up and fight: A peaceful protest will be held at 10.15am Saturday 14th September @ the corner of St John St & Patterson St, Launceston: You have a duty to be there, whether religious or not. All who have suffered abuse come along, this is your opportunity to be heard for Tasmania and its children and protest for what is right. Come and join us, then head to the polling booths to tell the government what you think!

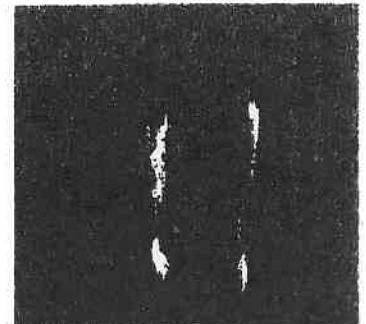

"Are Men Who Molest Boys Really Homosexuals?" "As demonstrated, child sexual abuse which is homosexual in nature (that is, involving a perpetrator and victim of the same sex) occurs at rates far in excess of the rate of consenting homosexual relations between adults. Even pro-homosexual activists do not attempt to dispute this fact." "There exists a disturbing historical connection between paedophilia and the gay-rights movement across the Anglo Saxon Nations." "The Consequences of Homosexual Child Abuse." "In other words, although heterosexuals outnumber homosexuals by a ratio of at least 26 to 1, homosexual paedophiles commit about one-third of the total number of child sex offenses." "Male Homosexuals Commit a Disproportionate number of Child Sex Abuse Cases." www.3-wm.com

"Why isn't Homosexuality Considered A Disorder On The Basis Of Its Medical Consequences?" "She related case histories of homosexuals needing emergency surgery due to "flating," "playing with toys," (inserting objects into the rectum) and other bizarre acts. I am certain—in light of my clinical experience, and since doing considerable amount of studying about it since that time—that homosexuality is neither normal nor benign; rather, it is a lethal behavioural addiction as Dr. Jeffrey Satinover outlines in his book, Homosexuality and the Politics of Truth. [1] As far as I know, there is no other group of people in the World that dies of infectious diseases in their mid-forties except practicing homosexuals." www.3-wm.com

"The only thing necessary for the triumph of evil is for good men to do nothing."

— Edmund Burke
