## PULP MILL BRIEFING INVITATION

Dear [REDACTED]

Gunns Limited has invested more than \$11 million to prepare in excess of 40 reports in conjunction with 43 consultants and companies to prepare an Integrated Impact Statement for a pulp mill in Tasmania.

The past 18 months represents more than 350,000 hours of research, analysis, modeling, planning and reporting.

Gunns Limited will soon submit its Integrated Impact Statement to the Resource Planning and Development Commission for assessment.

We are inviting you to an invitation-only update on the detailed science contained in our IIS on Thursday, July 27, 2006 at the Hotel Grand Chancellor in Launceston. Authors of reports will give presentations on key components of the IIS, such as transport, resource, air emissions, effluent impacts and health.

There will also be opportunities for those attending to ask questions of the scientists.

I have attached the program and look forward to hearing from you regarding your availability.

Only those who reply by Friday, July 21, 2006 to [mieke.guarrell@gunns.com.au](mailto:mieke.guarrell@gunns.com.au) or phone (03) 6335-5280 and present identification on the day will be admitted to the briefing.

Yours sincerely

John Gay  
**EXECUTIVE CHAIRMAN**
