

# RED

is any of a number of similar **colours** evoked by light consisting predominantly of the longest wavelengths of light discernible by the human eye, in the wavelength *range* of roughly. Longer wavelengths are called **infrared** and cannot be seen by the **NAKED** human eye. **Red** one of the

**additive primary** colours of **light**, **COMPLEMENTARY** to cyan, in RGB colour systems

**Join us for a celebration of the colour**

**6pm Thursday 3 March 2011**

15 Castray Esplanade Hobart  
Tasmania Australia 7000
